

PROBLEM STATEMENT:6

1.Index()

TC:1

```
students=["Arun","Bala","Kavin","Ravi"]  
position=students.index("Kavin")  
print("Index of Kavin=",position)
```

TC:2

```
students=["Arun","Bala","Kavin","Maha"]  
position=students.index("Maha")  
print("Index of Kavin=",position)
```

TC:3

```
students=["A","B","C","D"]  
position=students.index("A")  
print("Index of Kavin=",position)
```

TC:4

```
students=["Priya"]  
position=students.index("Priya")  
print("Index of Kavin=",position)
```

EX:

```
students=[1,2,3,4]  
position=students.index(2)  
print("Index of Kavin=",position)
```

output:

Index of Kevin= 2

Index of Kevin= 3

Index of Kevin= 0

Index of Kevin= 0

Index of Kevin= 1
