

PROBLEM STATEMENT:10

1. Copy()

TC:1

```
students=["Arun","Bala","Kavin","Ravi"]  
new_students=students.copy()  
print("Original List=",students)  
print("Copied List=",new_students)
```

EX:

```
students=["maha","suba","oviya"]  
new_students=students.copy()  
print("Original List=",students)  
print("Copied List=",new_students)
```

TC:2

```
students=["Arun","Bala","Kavin","Ravi"]  
new_students=students.copy()  
print("Original List=",students)  
print("Copied List=",new_students)
```

TC:3

```
students=["Arun","Bala","Kavin","Maha"]  
new_students=students.copy()  
print("Original List=",students)  
print("Copied List=",new_students)
```

TC:4

```
students=["A","B","C","D"]  
new_students=students.copy()  
print("Original List=",students)  
print("Copied List=",new_students)
```

TC:5

```
students=["Priya"]  
new_students=students.copy()  
print("Original List=",students)  
print("Copied List=",new_students)
```
