

PROBLEM STATEMENT:5

1.POP()

```
students=["Priya","Maha"]
removed_student = students.pop()
print("Removed Student =",removed_student)
print("Updated Students=",students)
```

TC:1

```
students=["Arun","Bala","Kavin","Ravi"]
removed_student = students.pop()
print("Removed Student =",removed_student)
print("Updated Students=",students)
```

TC:2

```
students=["Arun","Bala","Kavin","Maha"]
removed_student = students.pop()
print("Removed Student =",removed_student)
print("Updated Students=",students)
```

TC:3

```
students=["A","B","C","D"]
removed_student = students.pop()
print("Removed Student =",removed_student)
print("Updated Students=",students)
```

TC:4

```
students=["Priya"]
removed_student = students.pop()
print("Removed Student =",removed_student)
print("Updated Students=",students)
```

OUTPUT:

Removed Student = Ravi

Updated Students= ['Arun', 'Bala', 'Kavin']

Removed Student = Maha

Updated Students= ['Arun', 'Bala', 'Kavin']

Removed Student = D

Updated Students= ['A', 'B', 'C']

Removed Student = Priya

Removed Student = Maha

Updated Students= ['Priya']
